Profile

Motivated Information Technology student and freelance full-stack engineer specializing in artificial intelligence, machine learning, and scalable web development. Experienced in building robust software solutions, ranging from sophisticated AI systems like intelligent website chatbots and automated video analysis pipelines to Next.js full-stack applications. Adept at optimizing local LLM deployments, engineering distributed REST APIs, and automating complex workflows. Proven ability to orchestrate enterprise-level technologies to deliver innovative, efficiency-driven, and user-centric products.

Education

Diploma in Information Technology	2024 – Present
<i>N. G. Patel Polytechnic</i>	
• CGPA: 9.15	
• Academic Performance: Semester 1 (8.05 SPI), Semester 2 (8.15 SPI), Semester 3 (9.55 SPI), Semester 4 (8.81 SPI), Semester 5 (Ongoing)	
SSC (10th Standard)	Till 2024
<i>Sincerite English Medium School</i>	
• Percentile: 94.12	

Work Experience

Software Engineering Intern	June 2026 – July 2026
<i>Netsol IT Solutions Pvt. Ltd.</i>	
<i>Remote</i>	
• Developed a distributed Android application with an embedded HTTP server (NanoHTTPD) for local REST API hosting.	
• Optimized offline-first database synchronization using WebSockets and JSON-serialized SQLite data to reduce network overhead.	

Projects

FrameRead	(AI Video Summarizer & Analyzer) [GitHub]
• Built a video intelligence pipeline using Whisper and Qwen2-VL, integrating cloud-based LLMs via Ollama.	
• Engineered VRAM batching logic to optimize memory constraints for GPU inference.	
SocialArchive	(AI Reels Analyzer) [GitHub]
• Built an AI tool applying computer vision and LLMs to extract structured insights from short-form videos.	
• Enabled searchable archiving for saved social media content to enhance data retrieval.	
Sonance	(Minimalist Music Streaming App) [Live] [GitHub]
• Developed a minimalist Next.js music streaming app featuring client-side playback and playlist management.	
• Recognized in the top 1% of submissions in a frontend vibathon for exceptional UX design and interface clarity.	
Conlatus	(AI Screening Interviews) [Live] [GitHub]
• Developed an LLM-powered adaptive technical interview engine with deterministic real-time rubric scoring.	
• Implemented candidate and admin portals to streamline the evaluation and feedback lifecycle.	

Certificates

CS50: Introduction to Computer Science	2024
<i>Harvard University</i>	
<i>[Credential]</i>	
• Comprehensive grounding in algorithms, data structures, C, Python, SQL, and web development.	
Software Engineering Virtual Experience	2024
<i>J.P. Morgan • Forage</i>	
<i>[Credential]</i>	
• Engineered scalable enterprise systems by integrating Apache Kafka for data streaming and connecting a Spring application with an H2 database.	

Skills

Languages & Databases: Python, Java, C, JavaScript, SQL, HTML, CSS, PostgreSQL (Supabase), MySQL, SQLite
Frameworks & AI: Next.js, Node.js, Flask, FastAPI, Tailwind CSS, React.js, RAG, Ollama, Whisper, Claude, Prompt Eng.
Tools & Infrastructure: Git, Docker, pnpm, VS Code, Cursor, Antigravity, Linux, Windows 11, Vercel, Railway, Render, REST
Soft Skills: Problem Solving, Analytical Thinking, Effective Communication, Adaptability, Time Management

Languages

English (Proficient) • Gujarati (Native) • Hindi (Fluent)

Declaration

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.
